## **ADVISORY TO THE PUBLIC Priority Restoration to Critical Infrastructure and Other Facilities**

(Fadian, Mangilao) – Guam Power Authority crews are actively working to restore power following impacts from Typhoon Sinlaku. Initial restoration efforts are focused on critical infrastructure necessary for community response and recovery.

These priorities include hospitals, healthcare facilities, water wells, wastewater systems, communications infrastructure, emergency shelters, ports of entry and public safety services.

Restoring these facilities supports essential services and allows broader recovery efforts to begin. As critical infrastructure is brought back online, crews will continue working to restore main circuits and neighborhoods across affected areas.

GPA will focus on restoring all feeders and restore the Island-Wide Power System (IWPS) at full capacity. GPA line workers and support crews are working day and night for you, your family, and your businesses.

We thank you for your patience and ask for your continued support and cooperation as we work to bring our IWPS back to normal operations as quickly as possible.
