GPA Current Island-Wide Power System Status and Other Power Related Updates

(Fadian, Mangilao) – **As of 9:00 a.m. today,** the following is Guam Power Authority's current status of the Island-Wide Power System (IWPS) and other power related updates:

- Guam's IWPS did not experience a system blackout.
- GPA has about **51%** of distribution feeders/circuits online and most transmission lines powering the northern part of Guam is intact.
- Feeders/circuits serving Naval Base Guam, most of Hotel Row (Tumon), Guam Memorial Hospital (GMH), Harmon Industrial Park, Andersen Air Force Base, Camp Blaz and other underground systems in Tumon & Tamuning remained online.
- Units currently online include Ukudu Combustion Turbines (CT) 2 & 3, Piti 8, Dededo CT 2 and Pulantat Diesel. Other units were secured and will be available to serve loads as feeders are restored.
- All other GPA power plant units were secured as loads decreased throughout the duration of the storm.
- Substations which loss power include Talofofo, Umatac, Radio Barrigada and part of Pulantat. As soon as it is safe for crews to begin restoration, they will begin restoring power to these substations.

GPA is aware of multiple outages throughout the island caused by strong winds and gusts, especially affecting our southern sector customers**.** Crews are prepared to immediately begin key assessments and restoration efforts as soon as winds decrease to safe levels. GPA crews continue to work 12-16 hours per day once restoration begins.

GPA has procedural plans and priorities in place for post-typhoon recovery. Initial priorities of our GPA crews include repairing all transmission lines and powering substations.

GPA asks the public to please stay away from all downed or low-hanging power lines and equipment, assume it is energized and can cause harm if you come in contact with the lines or equipment. Consider such situations as dangerous and life threatening. If such conditions are present, please immediately report this to GPA's 24-hour Trouble Dispatch at 671 475-1472/3/4 or via direct message on GPA's Facebook page.

GPA asks for the community's patience and understanding as we get through this storm together.

Customers are encouraged to follow Guam Power Authority, Guam Homeland Security/Office of Civil Defense, and National Weather Service (NWS) Guam for the latest updates.
