## **GPA System Status Update on Island-Wide Power System as of 9:50 a.m., Tuesday, April 14, 2026**

(Fadian, Mangilao) – GPA crews continue with power restoration efforts at this time. GPA is aware of multiple outages caused by storm winds including down transmission lines affecting most customers in southern part of the island which crews are prioritizing along with critical feeders. As wind gusts increase additional outages are likely. Crews will stand down when line supervisors out in the field determine it is necessary, but so far continue to work on recovery.

The system has now severed itself between the north and the south. However, as of this time, power continues to flow to about 50% of our distribution feeders. Our major objective is to avoid a total system blackout because it would provide a quicker recovery for everyone. Our crews continue to work tirelessly. Please keep them in your prayers.

GPA appreciates the community's patience and understanding as crews work to safely restore power. For any outages, customers can contact the GPA 24-hour dispatch line at (671) 475-1472/3/4. Customer service representatives are also manning GPA's facebook page at [www.facebook.com/GuamPowerAuthority](http://www.facebook.com/GuamPowerAuthority).
