Power System Status Restoration and Power Related Updates **Day 3 since COR 4 – ST Bavi**

(Fadian, Mangilao) – The Guam Power Authority (GPA) continues its power restoration process and have made some progress to its post-typhoon recovery. In an effort to keep the public updated, we'll continue to provide a recovery summary that summarizes our restoration progress to the Island-Wide Power System (IWPS).

Impacts from ST Bavi - Recovery Summary

As of 10:00 a.m., Friday, July 10, 2026

IWPS	PERCENTAGES
System Load Restored	66%
GPA Feeders/Circuits Energized	73%

GENERATION CAPACITY	MW
Current Peak Demand (<i>Targeted Demand: 255 MW</i>)	140

Notes: - System Load percentage increases as GPA feeders/circuits percentage increases.

*****Feeders/Circuits are partially energized*****

Feeders/Circuits: A total of 49 feeders/circuits are **partially energized** today of the 67 distribution feeders/circuits.

TODAY'S KEY OBJECTIVES AND OTHER POWER RELATED UPDATES:

- Line crews are continuing restoration work on distribution lines in villages with minimal damage.
- Generation personnel continue to address generators for water wells and waste water service and transition to island power.
- As power lines heat up, weak points of the system will be apparent (*e.g., storm damaged transformers, fuse cutouts, lightning arrestors, connections*). Additionally, hardware components may have been loosened from the passing of the storm which may fail after power had been restored. Crews will do their best to make immediate repairs; if they cannot, they will return to make the repairs as soon as possible.
- During this stage of recovery, some energized feeders may still leave pockets of isolated customers with extensive damages. GPA will return to restore service to those remaining customers immediately after all other feeders without faults are restored.
- Continue working on urgent critical infrastructure and facilities across the island.

POST-TYPHOON RECOVERY PHASE II

In the second phase of the post-typhoon recovery, GPA crews are addressing all sectors (north, central and south) to restore as many customers (with minimal damages) as possible per feeder. Those with significant damages will be addressed in Phase III.

Areas of focus over the next 1 to 3 days include portions of the following:

(This schedule is subject to change and feeders/circuits may only be **partially energized** due to severity of damages in the areas.)

NORTH:

- **P-089, Dededo:** Route 1 southbound from Wusstig Rd. to Battulo St., including GHURA 505, Paradise Estates, Guam International Country Club (GICC), and surrounding areas.
P-089, Yigo: Route 1 southbound from old Ace Hardware to Wusstig Rd. and surrounding areas.
- **P-204, Tamuning:** Chalan San Antonio towards Guam Premium Outlets (GPO) and surrounding areas.
**Ongoing work in progress on P-204*
- **P-271, Dededo:** A portion of Harmon Loop Rd and surrounding areas.
P-271, Tamuning: Route 1 northbound towards Dos Amantes Plaza, Sgambelluri St., Adrian Sanchez St./Hamburger Road and surrounding areas.
**Ongoing work in progress on P-271*
- **P-312, Tamuning:** Route 1 northbound from Triple J to JFK HS; Route 10A from 76 station to Home Depot; Talo Verde and surrounding areas.
- **P-206/P-313, Tamuning:** Route 1 northbound former Hafa Adai Exchange to Don Don Donki village to airport road and surrounding areas.
- **P-330, Yigo:** Along Route 1 from Mataguac intersection towards Chalan La Chanch entrance, Chalan Kaskahu, a portion of Mataguac along Route 9 (Machanaonao, Agafa Gumas) to Potts Junction; to include Route 1 southbound (Paradise Meadows, Chalan Koda) and surrounding areas. **Ongoing work in progress on P-330*
- **P-331, Yigo:** Route 1 southbound from Papaya Ln. (Songsong Hills Subdivision) towards American Grocery to include Chalan Dokdok, Josen Diego St., Chalan Islan Guahan, Yigo Fire Station, Dominican Catholic School, FBLG Middle School, Mataguac & surrounding areas.

CENTRAL:

- **P-250, Hagåtña:** Hagåtña swamp to Route 4 toward Afame Rd. and surrounding areas.
P-250, Chalan Pago-Ordot: Along Route 4 from Spring Ln. to Route 10 intersection, including Dero Rd., Maimai St., and surrounding areas.
P-250, Sinajana: Sinajana Mobil, Holiday Towers, Afame Rd., Chaot, and surrounding areas.
P-250, Mangilao: From Mangilao on to Dairy Road toward Route 10 including DOC, portion of DYA and surrounding areas.
**Ongoing work in progress on P-250*
- **P-251, Hagåtña:** East O'Brien Dr, Route 1 and Route 8 intersection, including Bank of Guam, Reflection Center, Ada's Commercial Center, Big Hook, and surrounding areas.
P-251, MTM: Route 8 from Sgt. Roy T. Damian St. exit to ET Calvo Way, JA Camacho St. from East O'Brien Dr to Biang St., MongMong Catholic Church, CHamorro Gardens, and surrounding areas.
- **P-253, MTM:** Sgt. Roy T. Damian St., Biang St., west to Toto-Cañada Rd., Route 8 from Shop for Less to Maite Mobil; including West Cesario St., Chalan Machaute, and surrounding areas.
- **P-294, Mangilao:** Route 10 westbound from old Public Health to Route 4 intersection. Ta'i Mangilao, and surrounding areas.
P-294, Chalan Pago-Ordot: Route 10/Route 4 intersection, Chalan Ping Pago, Chalan Inda, Inalado Road, Ta'i Road, Pago Bay Estates to Pago Bay Resort and surrounding areas.
**Ongoing work in progress on P-294*
- **P-312, Barrigada:** Tiyan area along East Sunset Boulevard from Triple B Forwarders towards Landing Road (also known as Fourth Street), West Sunset Boulevard, Lower Sunset Boulevard, Central Avenue and surrounding areas.

SOUTH:

- **P-220, S  nta Rita-Sumai:** Route 17 (Cross Island Rd.) up to Bishop Flores St. and surrounding areas.
- **P-221, S  nta Rita-Sumai:** S  nta Rita village through Pale Ferdinand Way up towards Chalan Obispo Olano to RR Cruz St. and surrounding areas.
- **P-223, S  nta Rita-Sumai:** Route 2A from Taco Bell to Route 2, including Route 5, Sumai Payless, and surrounding areas.
P-223, H  gat: Route 2 from Route 2A intersection to Nimitz Beach, including Inn on the Bay, portion of Route 12, Pagachao Dr., H  gat village, Umang Rd., and surrounding areas.
- **P-294, Yona:** Route 4 (Chalan Kanton Tasi) from Yona village towards Pago Bay, M.U. Lujan Elementary School, St. Francis Church, portion of Pulantat towards tracking station, and surrounding areas.
**Ongoing work in progress on P-294*
- **P-301, Yona:** Pulantat, Chalan Teleforo; bottom of loop to Yona cliffside to Ylig and surrounding areas.

GENERATION CAPACITY:

- **GPA does not anticipate any generation capacity shortage**, and plans to restore power service using the remaining base load and reserve units.
- Total *generation system capacity for today is 275 MW* which is adequate for the *current load of 140 MW*.
- **Baseload units currently online and providing energy to the grid:**
 - o Piti Units 8 and 9
 - o Ukudu Power Plant GTG 1 and GTG 2
- **Additional generating units supporting the grid:**
 - o Combustion Turbines (CT) and Diesel Generating Units

PATH FORWARD

- For **Phase II** Post-Typhoon Recovery work, GPA line crews will continue repairs on distribution lines (feeders/circuits) with *minimal damage* and restore service as quickly and safely as possible.
- For **Phase III** Post-Typhoon Recovery work, crews will return to complete repairs on isolated areas with extensive damages after all feeders without faults are restored.
- Continue to address generators for water wells and waste water service and transition to island power and other critical infrastructure.

FOR CUSTOMERS WHO REMAIN WITHOUT POWER:

- Customers may be on feeders that have not yet been energized.
- In some areas, power may be restored to main lines while additional repairs are still needed on transformers, service lines, or customer connections.
- Customers may also be experiencing isolated damage that requires crews to return after main circuits are restored.
- If surrounding areas have power, customers may be part of a smaller outage pocket.
- GPA is aware of all customer outages through its Advanced Metering Infrastructure, or Smart Meter Network, and Supervisory Control and Data Acquisition (SCADA) systems. These systems allow GPA to confirm where power has been restored, identify customers still without service, and locate smaller outage pockets within villages.
- Customers are asked to limit calls to the GPA Dispatch Center (PSCC) to critical issues such as downed power lines, blown transformers, low voltage conditions, or other situations that may present a safety concern.

GENERAL NOTIFICATIONS:

- Voltage fluctuations during restoration: As power is restored, some customers may experience temporary voltage fluctuations such as flickering lights, dimming, or partial power. Customers are advised to shut off their main breaker and report the issue to GPA.
- Damaged Weatherheads and other Electrical Components: Customers are advised to conduct their own home and property assessment, including the weatherhead, meter socket and other electrical components. If electrical equipment such as the weatherhead or meter socket was damaged during the storm, it must be repaired before power service can be restored. For more information, please contact GPA Customer Service at (671) 647-5787/88/89.
- Please stay away from all down lines and equipment as they may still be energized and can cause harm if you come in contact with the lines or equipment. Consider such situations as dangerous and life threatening. To report downed power lines, contact GPA Trouble Dispatch at (671) 475-1472 / 1473 /1474. Customers may also email customersfirst@gpagwa.com or send a direct message on GPA's Facebook or Instagram page. Please provide the exact location or address, contact information and condition of location when submitting your report.

GPA understands that residents are eager to have service fully restored and thanks the community for the outpouring of support shown to crews working in villages across the island. **Residents are asked to allow crews to work unimpeded. While crews understand the urgency and concerns, stopping them to ask about restoration timelines delays progress and creates safety risks.** Allowing crews to continue their work and focus on their tasks at hand while concentrating on repairs will help ensure power is restored as quickly and safely as possible.

GPA will continue providing daily updates as restoration efforts progress. GPA thanks our customers for their patience and asks for their continued support as we work to bring our IWPS back to normal operations as quickly as possible.
