Island-Wide Power System 99% Recovered

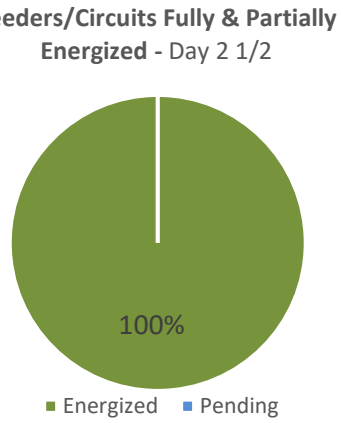

Day 2 1/2 since COR 4 – Typhoon Champi

(Fadian, Mangilao) – The Guam Power Authority (GPA) continues its power restoration process and continues to make significant progress to its post-typhoon recovery. In an effort to keep the public updated, we'll continue to provide a recovery summary that summarizes our restoration progress to the Island-Wide Power System (IWPS).

Typhoon Champi - Recovery Summary
As of 7:00 a.m., Wednesday, Oct. 21 2026
IWPS – 99% Recovered

Transmission Lines (50 each)	100%
Substations Energized	100%
Feeders/Circuits Energized *(Fully & Partially)*	100%
7:00 a.m. Demand (175MW) – Normal Demand Achieved	

Transmission Lines: All transmission lines restored.
Substations: All 30 critical substations are energized.
Feeders/Circuits: A total of 67 feeders/circuits are energized or partially energized of the 67 distribution feeders/circuits.
Generation Capacity: Adequate. (GPA does not anticipate any generation capacity shortage. All Ukudu generators including the steam turbine generator are online.)
Inventory Status: Adequate. (GPA has adequate inventory to ensure that critical materials and supplies are readily available when needed.)

TODAY'S KEY OBJECTIVES AND OTHER POWER RELATED UPDATES:

- **Line crews to concentrate restoration work on remaining distribution lateral & pocket outages. Any customers still without power after 12:00 p.m. today, please contact GPA's Customer Call Center at (671) 647-5787/88/89, email at customersfirst@gpagwa.com or sending a direct message to GPA's Facebook page. Please provide the exact location or address along with contact information when submitting your report.**
- During this stage of recovery, some pockets of isolated customers remain. GPA has begun addressing these remaining customers.
- In this phase of post-typhoon recovery, GPA crews are addressing all sectors: north, central and south to restore all customers.
- Generation personnel continue to transfer all water wells and waste water facilities from generator power to island power.
- Continue to address reports of low voltages, fluctuations, single phasing and other voltage issues. For **emergency power related situations**, call GPA's 24-Hour Trouble Dispatch at (671) 475-1472/3/4. Please provide exact location or address, contact information and condition of location. Please stay away from all down lines and equipment as they may still be energized and can cause harm if you come in contact with the lines or equipment.

OBJECTIVES OVER THE NEXT FEW DAYS

- GPA will continue to assess the IWPS and address remaining power quality issues that could lead to power outages or pose safety risks to the community.
- GPA to address reported streetlight issues to help ensure safer, well-lit roadways as the island prepares for Halloween festivities for children and families. To report needed streetlight repairs, please contact GPA's Customer Call Center at (671) 647-5787/88/89, email at customersfirst@gpagwa.com or send a direct message to GPA's Facebook page. Please provide address and location.

Customers may report **non-emergency power issues** - such as damaged weather heads, internal electrical damage requiring Emergency Work Clearances, or inquiries about service restoration - to GPA's Customer Call Center at (671) 647-5787/88/89, email at customersfirst@gpagwa.com or sending a direct message to GPA's Facebook page. The Customer Call Center will continue to operate 24/7 throughout the post-typhoon recovery period.

Thank you everyone for your patience, and thank you to the GPA Team for your professionalism and hard work restoring our community after such a catastrophic weather event.
